With services like **BIM, AI and Enterprise applications** we help businesses to boost productivity, drive profitability and RoI.

Tekla Structures Courses

1

Basic

- Introduction to Tekla Structures
- Grids creation and modification
- Modeling Training
- GA & Shop Drawings

2

Basic + Advance

- Introduction to Tekla Structures
- Grids creation and modification
- File Customization & NC Files Generation
- Profile, Material & Bolts Catalog

3

Advance

- File Customization
- Profile, Material & Bolts Catalog
- Auto Connection & Auto Default
- NC Files Generation

4

Expert

- Macro Recording
- Report in .xls format
- Customization of property pan
- Template Editor

What Will You Discover?

Our Tekla courses—Basic, Advanced, and Expert—cover everything from foundational concepts to advanced capabilities, aligning with industry standards. You'll master 3D modeling, detailing, and connections for steel structures, create General Arrangement and Fabrication Drawings, export construction management data, and generate NC files for fabrication.

Skills You Will Enhance

- Gain a solid foundation in Tekla Structures software.
- Navigate through introductory concepts and essential functionalities.
- Dive into advanced modeling techniques, including customizations and optimizations.
- Master the Template Editor for both textual and graphical templates.
- Develop proficiency in drawing creation, editing, and object-level settings.
- Apply your learning to projects, bridging the gap between theory and practice.

Why Stridely Academy?

- Industry Need-Based Curriculum
- Live Projects & Assessments
- Tekla Certification
- Internship Opportunities
- Job Assistance
- 100+ Tekla resources Trained
